About Us

Tiegerman's motto, "Giving Our Children a Voice", reflects our goal to meet the needs of school age children with severe language and autism spectrum disorders. We believe that students with autism spectrum disorders have underlying language disorders.

At Tiegerman, our mission is to identify children with language and autism spectrum disorders early to provide educational programs which will prepare them for a world filled with words, sentences, stories and messages.

We use the Tiegerman Language Method (TLM) which is designed to stimulate and challenge children's language development. We believe that "language is everything and everywhere," so our children need to be immersed in language activities to learn. We teach children to talk in order to reach the person inside.

Tiegerman sets the pace in New York State with innovative programs that address the unique developmental needs of children struggling to develop the words to reach out to others. Interactive classrooms are structured as language laboratories with small class size, taught by a licensed professional faculty dedicated to each child's social, emotional, intellectual and language development.
